

Think we're providing just another
Practice Management System?

think again!

Understanding your market, everyday tasks and typical challenges has helped us to develop our software to ensure that it offers you everything that you need.

We haven't tried to make your requirements fit our system, instead, we listened from the start and we built it with all the intricacies and smart features that you need to best support your patients and practice.

With our PMS handling the detail, you can be focused on delivering the very best care for your animals.

VetIT promises you:

- An intelligent and intuitive interface, designed to be user-friendly
- Simple IT infrastructure with the peace of mind that backups happen automatically
- Access from anywhere, any time
- Outstanding support 7 days per week from our friendly team
- Cloud based technology
- Thorough and categorised in-depth reporting
- Comprehensive accounting features to allow management of payments, invoices and debt

PLUS the ability to:

- Flexible 'drag and drop' diary to view multiple days, locations and hospital bookings
- Price profiles allow customisable prices at practice, client and VIP club levels
- Stock management - import deliveries, manage price updates, stock levels and dispensary
- Idexx lab integration
- Reminder management module allowing multiple different delivery methods - SMS, Email or post
- Export detailed reporting information for your business
