

Think we're providing just another  
Practice Management System?

**think again!**

Understanding your market, everyday tasks and typical challenges has helped us to develop our software to ensure that it offers you everything that you need.

We haven't tried to make your requirements fit our system, instead, we listened from the start and we built it with all the intricacies and smart features that you need to best support your patients and practice.

**Keeping up with your animals is the number 1 priority,  
so let our PMS handle the rest.**

#### **VetIT promises you:**

- An intelligent and intuitive interface, designed to be user-friendly
- Simple IT infrastructure with the peace of mind that backups happen automatically
- Access from anywhere, any time
- Outstanding support 7 days per week from our friendly team
- Cloud based technology
- Thorough and categorised in-depth reporting
- Comprehensive accounting features to allow management of payments, invoices and debt

#### **PLUS the ability to:**

- Onsite working using our mobile app even without a connection
- Customise pricing per herd, farm and client
- Search and identify herds by different locations and CPH numbers
- Calculate net-net pricing
- Configure appointments to the length that you need
- Import and stock control with batch numbers for distribution
- Export detailed reporting information for your business
